

## NATIONAL VEGETATION DATABASE

### Additional general-use Turboveg datafields

Mandatory fields highlighted in grey

|    | FIELD NAME | FIELD_CODE | TYPE | LENGTH | DECIMAL | DESCRIPTION                                | NOTES  |
|----|------------|------------|------|--------|---------|--|--|
| 38 |            | LOCATION   | C    | 99     | 0       | Location                                   |  |
| 39 |            | V_COUNTY   | C    | 3      | 0       | Vice county (botanical)                    |  |
| 40 |            | HAB_TYPE   | C    | 99     | 0       | Habitat type                               | Fossitt habitat categories should be used where possible.  |
|    |            | EUNIS_CODE | C    | 99     | 0       | EUNIS code                                 | EUNIS codes should be used where possible  |
| 41 |            | X_COORD    | C    | 6      | 0       | Easting                                    |  |
| 42 |            | Y_COORD    | C    | 6      | 0       | Northing                                   |  |
| 43 |            | LATITUDE   | N    | 6      | 0       | Latitude                                   |  |
| 44 |            | LONGITUDE  | N    | 6      | 0       | Longitude                                  |  |
| 45 |            | GRID_CODE  | C    | 10     | 0       | Irish grid reference                       | An Irish grid reference, an easting and northing, or a latitude and longitude must be supplied.                                |
| 46 |            | SOIL_TYPE  | C    | 99     | 0       | Soil type                                  |  |
| 47 |            | AUT_NAME   | C    | 99     | 0       | Author name                                | This is the name of the person who collected the relevé information.<br>Format used: A. Bleasdale                              |
| 48 |            | ENT_NAME   | C    | 99     | 0       | Name of data enterer                       | This is the name of the person who entered the data into Turboveg.<br>Format used: E. O'Sullivan                               |
| 49 |            | LIT_SOURCE | C    | 99     | 0       | Literature source                          | This refers to the survey/project within which the relevé was collected.   |
| 50 |            | PLANT_SPP  | C    | 99     | 0       | Focal plant species                        | Where a relevé is part of a survey on a specific plant (e.g., rare/threatened), the name of the focal species is entered here. |
| 51 |            | SOIL_CM    | N    | 5      | 1       | Soil depth (cm)                            |  |
| 52 |            | BARE_SOIL  | N    | 3      | 0       | Cover bare soil (%)                        |  |
| 53 |            | SAMPLE_NO  | C    | 20     | 0       | Sample number of relevé in original survey | This refers to the number given to the relevé in its original survey.  |
| 54 |            | SITE_NO    | C    | 20     | 0       | NPWS site code                             | This refers to the number given to the site in its original survey.  |
| 55 |            | QUAD_DIMS  | C    | 7      | 0       | Quadrat dimensions                         | Format used: 3x1   |
| 56 |            | MOSS_MM    | C    | 15     | 0       | Moss height (mm)                           |  |
| 57 |            | PH_VAL     | N    | 4      | 2       | pH   |  |
| 58 |            | WATER_CM   | N    | 7      | 0       | Water depth (cm)                           |  |
